

## PRESS RELEASE

### KLK EMMERICH SITE IN EMMERICH, GERMANY RECEIVES EXCiPACT GMP & GDP CERTIFICATIONS AS PHARMACEUTICAL EXCIPIENT SUPPLIERS

**Brussels, 18 December 2019**

EXCiPACT asbl is pleased to announce that the **KLK Emmerich site in Emmerich, Germany** has recently been awarded an EXCiPACT GMP Certificate from **DQS**, one of EXCiPACT's internationally recognised Certification Bodies.

The Certificate demonstrates that this site manufactures caprylic/capric triglyceride as Palmester 3595 EP and Palmester 3585 EP including the filling of tank trucks, IBCs and drums, storage, dispatch and marketing of these products; the filling of pharmaceutical excipients, liquid oleochemicals in drums and IBCs, including their storage and dispatch as pharmaceutical excipients according to the EXCiPACT Good Manufacturing Practice (GMP) and the Good Distribution Practice (GDP) Certification Standards.

Both **DQS** and their auditors had to undergo a rigorous assessment process in order to be EXCiPACT Registered. Both have satisfied the additional EXCiPACT competency requirements set out in the EXCiPACT annex to the ISO/IEC 17021-1:2015 standard. These include completion of the 2-day EXCiPACT Auditor Training Course, post-course written examination and independently witnessed audit to verify their competency to the required standard. **DQS** also had to have their auditor's report verified by their independent certification board prior to issuing the certificate.

For full details of all sites that have been EXCiPACT certified to date in 18 Countries (Canada, China, Belgium, France, Germany, India, Indonesia, Israel, Italy, Japan, Romania, Saudi Arabia, Singapore, Spain, Switzerland, The Netherlands, UK and USA), see <http://www.excipact.org/certificate-holders.html>.

EU and U.S. pharmaceutical regulations require drug manufacturers to conduct either their own or third-party physical risk-assessment audits of all their starting material suppliers to demonstrate GMP and/or GDP compliance thus increasing the audit burden. However, using GMP and GDP standards designed specifically for pharmaceutical excipients, the voluntary, independent, high quality, EXCiPACT Certification Scheme helps pharmaceutical excipient users and their suppliers to demonstrate their commitment to GMP/GDP, to reduce their audit burden, to save costs and to assure product quality.

#### Notes for the Editor

EXCiPACT asbl provides management oversight for the voluntary, independent, high quality international EXCiPACT Certification Scheme that provides for independent 3rd party GMP and/or GDP certification of manufacturers, suppliers and distributors of pharmaceutical excipients worldwide. The Scheme ensures patient safety through supplier quality while minimising the overall costs for assessing the excipient supply chain. It has been operational since early 2013 since when there has been considerable interest among pharmaceutical excipient suppliers, their customers and regulators.
